## STEP 1: Creating a concept

Your first challenge is to create a Surrealistic composition.

**Surrealism:** All objects are drawn REALISTICALLY, but they are COMBINED in unrealistic ways.

Start by making a list of 20 inanimate (not living) objects. Don't overthink it. Write down the first 20 objects to come in to your head.

Look these images up on your phone or computer. What kind of lines are they made up of? What connections do they have? How can a hand be incorporated with any of them?

Create a rough sketch of your idea below (you are not required to use all 20). Nothing has to be perfect or shaded. Your hand can even be in "stick figure" form.
