

MIXED MEDIA

PROJECT GOAL: Create a mixed media composition that shows visual movement and a variety of mediums.

Students will lay a foundation of different paper types on chip board. Once a subject has been determined, students will lightly sketch it on the papers. A different drawing tool will be used as the subject changes paper surfaces. For example, white color pencil may be used on black paper and then transfer to color pencil on book pages.

REQUIREMENTS:

You need a minimum of 10 PAPER CHANGES. You may have more.

Glue your papers to the board. You can use any shapes you want.

Your subject/composition should show VISUAL MOVEMENT.

Lightly sketch your composition across all paper surfaces.

Do the shading with different mediums based on your paper choice. It needs to have HIGHLIGHTS, SHADOWS, and DEPTH.
