

Using your prior knowledge, replicate the drawing of this teddy bear. There are no measurements given for this assignment. You will need to estimate proportions (comparison of one object to another) of each part. You will be evaluated on the accuracy of the PROPORTION and PLACEMENT of body parts. Align it to the center, write your name on it, and share with me on Google Drive.

QUICK TIPS:

Right click on an object to Transform > Reflect (vertically or horizontally) > Copy; this will allow you to replicate objects without having to draw them multiple times.

Right click Arrange > Send to the Back or Bring to the Front will allow you to overlap

Ctrl + C = Copy Ctrl + V = Paste

Hold the Shift Key when selecting multiple items so that you can Right Click > Group or Align a group of objects; hold the Shift key while dragging the corner of an object. You can make the shape bigger or smaller without losing proportion.

The mouth will be made with the Pen Tool.
