

The instructions for each Type Tool is given in the example. Save as a PDF and submit via Google Drive.

*Some type tools require you to set a path first. This is accomplished with either the pen tool or shape tool. You must CLICK the cursor ON the path to begin typing. If you click in the general area, you will get an error message. Once you click, it becomes font so you will need to make another copy of the shape if it's a background.

*Unless a specific font type is indicated, you may use any font of your choice. Keep in mind, some fonts are larger than other and may not fit as well.

*Font adjustments (i.e. Leading) can be found in Windows > Type > Character. Text alignment is under Paragraph on the menu bar. Illustrator will 'save' the last adjustment in font you made, be sure not to repeat actions (tracking, etc).

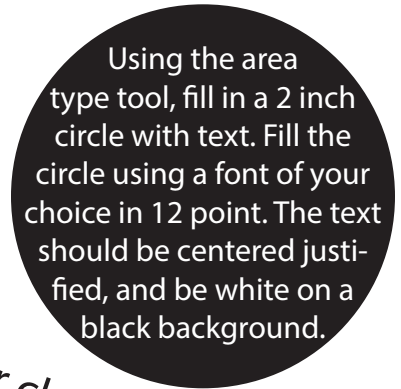

My Name/ Visual Communications/ Myriad Pro/ 21 pt

Setting type on a curving path.....
